### Recommendation for Snowplows

We have contacted three companies for estimates for snowplows on the new Ford F250 trucks. We have contacted Midstate truck equipment, Truck Pro equipment sales, and Premier outdoor power.

-Midstate Truck equipment came in at \$8,950.00 per Boss V-plows installed.

-Truck Pro equipment sales came in at \$8,970.00 per Boss V-plows installed.

-Premier outdoor power denied bid, Midstate is where they purchase all Boss products.

We propose using Midstate truck equipment for the installation of the snowplows on the three new Ford F250 trucks the town just purchased. Midstate came in with the lowest cost per truck at \$8,950.00. The total cost of all three plows installed would be \$26,850.00.

Respectfully,  
Nick Brown
