RE: PC-2023_013

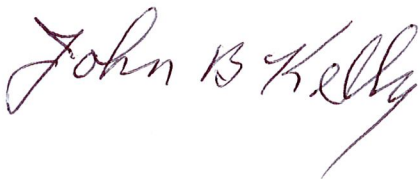

1. All my surface water on 30-02-18-100-017.001-016 drains across Helm's Mill Pud planed development into Bee Camp Ditch. This is through a 10 inch tile. I AM requesting a man hole be placed on my property into the drainage system Of Helm's. At the present time there is a breathing PVC pipe that allows one to observe the ditch working.

2

My property ajoines both the West and North sides Helm's Mill Pud. I am requesting a mound with trees be built between my property and Helm's Mill PUD on both West and North sides.

3. I am submitting two pictures showing the ditch ;ocation snd the 19 inch Tile.
