

S.R. 67 & C.R. 600 W Intersection Improvements

PROJECT OVERVIEW

This project will involve the construction of right turn lanes on C.R. 600 W on each side of its intersection with S.R. 67. This project will include:

- Infrastructure improvements:
 - New pavement and sidewalk
 - New storm sewer and inlets
 - New handicap ramps
- Traffic signal improvements
 - Signal Modification
 - Pedestrian street crossing

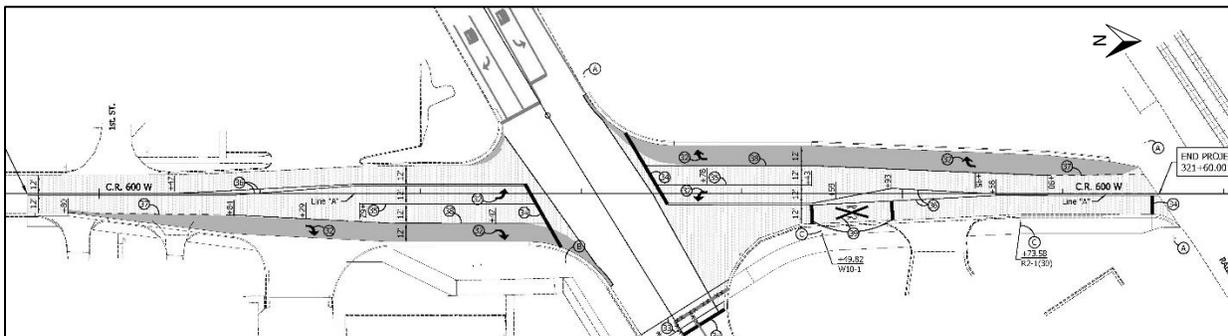

This project will not require any closures of the road and will be constructed under traffic. Businesses and homes affected by the construction will have access throughout the project via temporary drives or alternative entrances to the parking lots. CrossRoad Engineers and the Contractor will be working with businesses and residents to coordinate multiple items such as the construction of the new sidewalks and drives, as well as asphalt milling and overlaying.

PROJECT SCHEDULE

The contractor will begin work the week of May 14th. Construction signage will be put in place to help vehicle and pedestrian traffic navigate the work zones. Residents/Property Owners will receive additional newsletters throughout the project that will provide updates.

Work in the upcoming weeks will consist of: construction signage setup, installation of erosion control measures, clearing of right of way, and storm sewer work.

PROJECT ILLUSTRATION

For any questions regarding the project, please contact Justen Hochstetler at (574) 354-2677 or jhochstetler@crossroadengineers.com
