

Tracked Skid Steer

We have contacted three different skid steer manufacturers for quotes including Bobcat of Anderson, RPM machinery (Case), and MacAllister Cat. Bobcat of Anderson came back with the best price for the new machine. The new machine would be used for many different projects including town hall path replacement, loading salt in the winter, and help with different road projects. They make many different attachments for this machine making it very universal for years to come.

- (1) Bobcat of Anderson- T66 T4 Bobcat track loader. This machine is equipped with a 74-horsepower diesel engine. It will come with a 74-inch front bucket. It has an enclosed cab with heat and ac. The total price for the new machine is \$68,193.17.
- (2) RPM machinery- Case TV370B track loader. This machine is equipped with a 74-horsepower diesel engine. It will come with an 84-inch front bucket. It will also be an enclosed cab with heat and ac. The total price for the new machine would be \$73,975.00.
- (3) MacAllister Cat- Cat 259 D3 compact track loader. This machine comes with a 74.3-horsepower diesel engine. It will come with a 74-inch front bucket. It will also have an enclosed cab with heat and ac. The total price for the new machine would be \$74,725.00.

Ron and I feel we should purchase the Bobcat T66 T4 track loader for \$68,193.17
