RE: Mt. Comfort Road (CR 600 W)
Path separation treatment options
Fee Proposal for Assignment #2

Dear Mark:

As you requested, we have prepared and are submitting a fee proposal to develop an Abbreviated Engineer's Assessment for options to address the existing pedestrian condition of CR 600 W from approximately 440 feet south of the intersection with Emerald Blvd. to approximately 1,200 feet south of Emerald Blvd. The services will include documenting existing conditions, performing research on standard practices and documentation of alternatives to provide separation between the existing roadway and path/sidewalk. Options can include (but not necessarily be restricted to) providing delineator posts or other barriers and/or removing pavement. In addition, cost opinions of each alternative will be provided. Existing conditions will be determined via a site visit; no formal topographic survey will be performed.

The compensation for these services will be hourly rates based on the hourly rate table in the original contract which are attached for convenience. We are proposing a not-to-exceed cap of \$8,500 for this assignment.

If you have any questions as you review this material, please call.

Sincerely,

CrossRoad Engineers, PC
