Recommendation Letter

The first quote is from Joe Larr with Traffic Control-Safety Equipment who declined to quote after his company could not provide the requested equipment or provide the labor to install.

The second quote is from Carrier & Gable. This is the company we purchased the Fire Department Opticom's. This quote is the lowest quote however, in the notes number 4 they do not install.

The third quote is from Signal Construction. This is the company from Greenfield who we contract for maintenance of the towns stop lights. This company does install.

On both quotes I requested the TRAFFICALM IQ 1500 SOLAR W/SOP, or as we know it, "your speed", these two will be installed on 600W only. The two R829-F dual beacon SZ flashers will be installed on 700N.

Public Works staff recommends the Signal Construction quote due to installation being included. We also recommend the two SOP for 600W.

Carrier & Gable Inc, \$44,844.00

Signal Construction Inc, \$48,044.80

Ron Crider

Public Works Commissioner
