Town Council

Re: Force Main Maintenance

Council members:

The Wastewater department received three quotes for force main maintenance to the Austin Trace and Bay Creek force mains. The maintenance includes replacement of the air release valves, inspection for damage, and exercising of the isolation valves. There maybe damage to the force main as the existing valves are removed. The quote was for a time and material basis. There will likely be other costs than shown below as some damage is expected and a vac truck would be required if the line is damaged and there is spilled sewage. **Staff would like council to approve a not to exceed price project cost of \$25,000 for Culy Contracting.** They were the low cost and we are building in a considerable amount of contingency in case there is excessive damage or the need for isolation valve replacement.

	Daystar Directional Drilling	Culy Contracting	Johannigman Excavating	
Air release valve replacement	\$3,546.25	\$1,485.00	\$3,330.00	
Crew rate	\$285.32	\$250.00	\$275.00	
Austin Trace and Bay Creek Air Releases				
valves	5	\$17,731.25	\$7,425.00	\$16,650.00
hours per valve	3	\$4,279.80	\$3,750.00	\$4,125.00
Total Cost		\$22,011.05	\$11,175.00	\$20,775.00

Sincerely,

Mark J. Witsman, P.E.
Town of McCordsville
