STAFF REVIEW: Variance Request – Section 4.01(D)(4)(b&f)

This section prohibits solar panels, within residential zoning, from being placed “on any front or side roof plane or slope”. Additionally, the language prohibits equipment and components from being visible from any property or street. The petitioner proposes panels on roof planes which will be visible from the street.

STAFF RECOMMENDATION:

The solar panel standards were recommended by staff and adopted by the Town Council in 2016. As we continue to learn more about solar panel technology, and it continues to become more of an available option for those wishing to diversify their power sources we expect to see more such requests. While staff still has some concerns regarding the outright allowance of solar panels on all roof planes without public input and consideration by the BZA, staff will support this petition so long as there is no remonstrance from the neighborhood. Staff does have recommended conditions of approval, as noted below, and we reserve the right to alter these prior to or during the meeting.

Proposed Conditions of Approval:

- All panels and other roof mounted components shall project more than six (6) inches above the roof plane.
- All panels and other roof mounted components shall be mounted parallel to the roof plane.
- The panels shall be matte black.
- All other equipment shall not be attached to the front elevation of the home.

At the time this report was written staff had received no letters of remonstrance against the petition.

The BZA may include conditions of approval noted above, and if so, those conditions should be incorporated into the ballots. They may be amended, added to, or removed by the BZA. The petitioner also has the right to request them to be amended, added to, or removed until the time the BZA has made a motion on the conditions.

The BZA has four (4) options in considering this request; the Board may approve, approve with modifications, deny, or continue this petition.

Update from previous BZA Meetings:

Town inspectors have inspected the panels and do believe the panels have been installed per code and in keeping with the requirements the BZA typically imposes on visible roof-top solar panels. While we have not received any written remonstrance, we did speak with a member of the Woodhaven HOA Board who expressed concern. We anticipate a representative of the HOA Board will be present to speak on their behalf at the meeting. Additionally, we have confirmed that public notice has been provided.
