McCordsville Public Works,

I am interested in hooking to the sanitary sewer system. I am on the border of the Town of McCordsville. A sewer line would need to be ran down the street. There are a number of us along the road that are using aging septic systems. A sanitary sewer system would be a benefit to many as time goes on. I understand that I would need to be annexed into the Town to have access to the sewer system. Please let me know if this is a possibility.

Thank You,

Tony Keaton
