THE TOWN OF  
**McCCORDSVILLE**

Next Stop  McCordsville

Do you have an old cellular telephone that you no longer use or has been replaced with a newer model?

Are you concerned with poisonous materials being placed into our local landfills and endangering our way of life?

If you answered yes, the McCordsville Police Department can help. The McCordsville Police Department has joined forces with GRC Recycling, a Miramar, Florida company that specializes in cellphone recycling. Just bring in your unwanted, working or non-working cellular telephone and battery and the McCordsville Police Department will take care of the rest. There is no cost to you, and you can help protect our environment without spending anything more than a few minutes to drop off a piece of equipment that you would have normally thrown into the trash.

Additionally, your tax dollars will not be spent to provide support to this program. GRC Recycling provides ALL of the materials necessary to advertise, box, and ship the collected cellular telephones.

Please help us, help the environment.

Sincerely,

Harold C. Rodgers, Jr.  
Chief of Police  
McCordsville Police Department  
(317) 335-2812
