

# HOW WILL YOU STAND OUT?

## JULY 23-24-25 2019

**Google Street View** is a tool used regularly by folks to find where they are going. Normally, that view is very basic – a trip down a street on any given day. How would you like to make that view - - **more interesting???**

Hancock County Tourism has partnered with Truly 360 to capture Hancock County's **Google Street View**. This will be Hancock County's opportunity to showcase our great communities, its businesses, organizations, attractions, events, and most importantly - **YOU** the residents of our great county.

In July, Truly360, will be capturing the official **Google Street View** in all of Hancock County's main communities. They will be focusing on our main business districts and taking a route around our **major cities and major attractions**.

How can you make that capture more **interesting?** Why don't you **strike a pose** and be **part of the scenery?** Have fun, be entertaining and give a shout out and **advertise** your local business, organization, or just **show your community pride**. Fill the street with people, activity, and interesting things to see. Signs, T-Shirts, Banners are highly recommended to **stand out** and be seen.
